Introduction

Mercury is the closest planet to the Sun and the smallest one in the entire Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god. Mercury's surface is full of craters and plains

Mercury takes a little more than 58 days to complete its rotation, so try to imagine how long days must be there! Since the temperatures are so extreme, albeit not as extreme as on Venus, Mercury has been deemed to be non-habitable for humans

Awesome words

A photograph of a man and a woman bowling in a modern, well-lit alley. The woman, on the left, has long red hair and is wearing a white blazer over a white t-shirt and tan pants, smiling as she holds a teal bowling ball. The man, on the right, is in a bowling stance, wearing a blue and white striped shirt over a black t-shirt and jeans, also smiling. The alley has a dark, patterned wall in the background with a red chandelier and a large letter 'N'. Bowling balls are lined up on the lanes. The image is framed with a decorative border of small white stars.

A picture is worth a thousand words

A picture always reinforces the concept

Images reveal large amounts of data, so remember: use an image instead of a long text. Your audience will appreciate it
